PERSONAL PROJECTS

Project: Remote Job Aggregator

GitHub: <https://github.com/Umoru98/remote-job-aggregator>

Description:

Developed a Node.js-powered web scraping application that aggregates remote job postings from multiple online job platforms. Features automated data collection, MongoDB storage, Express.js API, email alerts, and scheduled updates via cron jobs..

Project: Subscription Tracker API

GitHub: <https://github.com/Umoru98/subscription-tracker-api>

Description:

Developed a RESTful API for seamless subscription management featuring JWT-based authentication, protected routes, Arcjet-powered rate-limiting and bot detection, automated renewal reminders via Upstash Workflows, and MongoDB integration. Ideal for SaaS platforms and personal finance apps.
